INTRODUCTION

I-CON MEP Smart Solutions is a leading MEP company in Egypt specialized in providing an unrivaled range of top-quality services and systems to Quality-Oriented organizations, focused on making their work, equipment, and facilities stand out as paragons of operational efficiency and profitability.

I-CON's team of designers & engineers has utilized their many years of experience working on the tools to provide our clients with the very best MEP design and installation services.

ABOUT I-CON

COMPANY BRIEF

We have established ourselves as leading mechanical, electrical and plumbing contractor providing premier quality in to incorporate major renewable and renewable energy systems to fulfill all our customer's requirements in one stop.

The major scope of our MEP services is the design, supply, installations, testing, commissioning of MEP of systems and equipment of all types of buildings under construction. Our values are designed to total client satisfaction in one stop.

APPROACH STRATEGY

We will advice clients to help them decide what they need. The company works closely with architect, consultants, and interior designers to deliver what is right for the project.

We invest time and effort to offer the latest technologies. The company intentionally works with highest quality suppliers only, however, it is completely independent; as it is not dependent on merely one technology provider.

06

SINCE 2012
Ten years and counting
WE HAVE FINISHED OVER
55 PROJECTS

08

MISSION:

Striving for the greatest possible impact of energy saving; by achieving the best value in the local mechanical and electrical services in the construction industry while following safety regulations.

VISION:

To become the foremost MEP Smart Solutions provider in the industry, serving world-class quality service while guaranteeing transparent provision of services.

I-CON EDGE

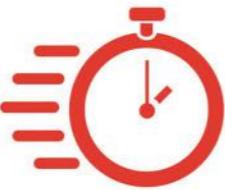

Mechanical, Electrical and Plumbing coordination is the harmonization of all the building services with other disciplines that form the building fabric, structure and external envelope.

With the 3D MEP drawing, we coordinate accordingly with our expertise and do any essential design changes so that they can befit all requirements as far as ease of fabrication, lagging, insulation allowance and installation efficiency is a mandatory consideration. Concerning some of the changes that might occur on site include duct resizing, pipework rerouting, splitting of the electrical ladder, change of equipment, etc."
